

Remarks

The specification has been amended to insert a cross-reference to the parent applications.

The claims have been amended to put them in the same condition as in the parent application.

Thus, claim 4 has been rewritten to depend from claim 3, and claim 5 has been rewritten into independent form. Claims 8 and 12 have been amended to correct their improper multiple dependency, as a result of which new claims 13 and 14 have been added to the application.

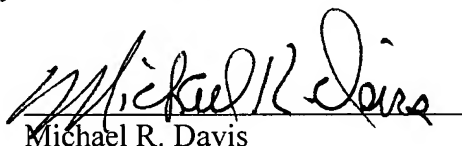

New claims 15-17 have also been added to the application. Claim 15 is supported by page 14, line 8 from the bottom of the Specification. Claim 16 corresponds to claim 3 in independent form, combining the subject matter of claims 1 and 3. Claim 17 corresponds to amended claim 4 in independent form, combining the subject matter of claims 1, 3 and 4. However, it is noted that each of claims 16 and 17 uses the term "consisting of" in defining the composition of the steel.

New claim 18 is the same as claim 12 except that it is dependent on claim 4.

Respectfully submitted,

Nobuyuki FUJITSUNA et al.
